Who is Abdul?

I am a **Writer** at heart, crafting narratives that inspire. My work spans from tweets to micro storytelling. (I would never use artificial intelligence to write content).

As a **Tech and AI Enthusiast**, I'm constantly seeking the latest innovations, immersing myself in new technologies, experimenting with them, and facilitating discussions about their potential impact on humanity.

In my role as a **Social Media & Community Manager** at [Stabraq](#) I represent modern Muslims by inspiring and amplifying the voices of dreamers and changemakers globally.

When not immersed in these, you'll find me at the gym, working out to become my best self and trying to be a healthier person (the word is making us sick, gotta fight that however we can).

I'm an Apple ecosystem enthusiast, I hold my iPhone capturing the world's beauty around telling my story with unfiltered shots.

Education

Business Administration
Faculty of Commerce, Cairo University

September 2017 - September 2024
